Ok, we did get some preliminary results on March 2nd sand March 8th. We received the validated results in a report on March 20th. Your statement is correct, Joan.

OK – so let’s agree on the timing – ;o)  
Current Statement says...EPA asked Chemours in January to do the sampling...that is correct – we made our request in January; this coincides with what we said back in January when we had the first rollout.

Chemours did the sampling in February 2018.

However, the results were not shared until March 2018.  
Rick – is this correct? We want to get this right...please advise...thanks.  
joan

That's fine. Just know the title in the document will be inconsistent with the web and the desk statement.

If we change it to February, we need to update the statement to say February as well.

Christina – thank you SO much.

Rick – what should the document be dated? March 2018?

No worries, I can do it. I just wanted to check before running it through the application.

Rick – is it?  
If not, Christina – can you do it there? Is that too much work?  
I just don't know who is in today in the regional office who can do it.

**Subject:** FW: GenX sampling results

Christina, can you post the attached PDF under the Washington Works bullet on: <https://www.epa.gov/pfas/site-specific-information>

Let's call the PDF: Chemours Company well sampling results (March 2018)

Does that work for folks?

If so, Christina, let us know once it's up.

**Subject:** FW: GenX sampling results

Andrea,

Please see attached table for GenX (HFPO-DA) sampling results for the 14 public and private water supplies in West Virginia and Ohio.

Is it possible to get it posted onto the website soon?

If so, we may still be able to make the notifications today – please advise.

Thank you!
